

AGRI-PLASTICS

The Calf Housing Specialist®

BEGIN STRONG. STAY STRONG.

HUTCH LATCH

- Winner of the 2020 World Ag Expo Top 10 Products
- Secures hutches, reduces stress and ensures safety of calves
- Hinged latch allows for quick set or release of the cable

Hinged Latch swings up and
down to quickly set or release
the wire cable

Keep your calves and hutches secure and safe!

The Hutch Latch offers an innovative safety feature to secure calf hutches, reduce stress, and ensure the safety of calves. The Hutch Latch is securely attached to the top of each hutch with a backing plate, four carriage bolts, and flange nuts. A steel wire rope runs the length of the row of hutches and is locked in place by The Hutch Latch. A simple release lever allows easy removal of the cable, but this lever also securely locks in position so that the cable will not be released during inclement weather.
