PRODUCT CATALOG

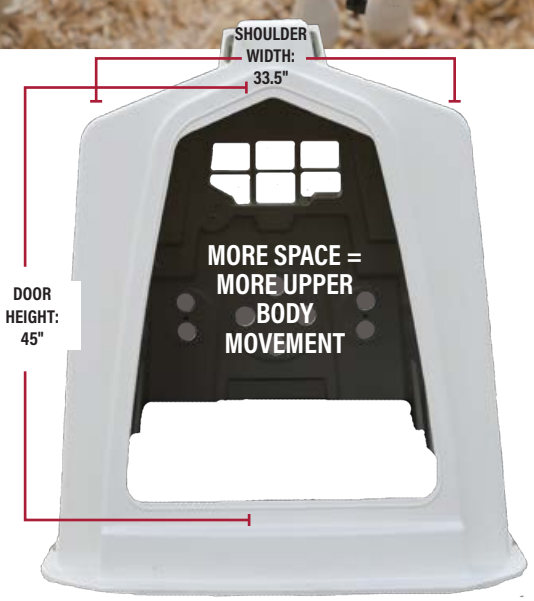

AGRI-PLASTICS
The Calf Housing Specialist®

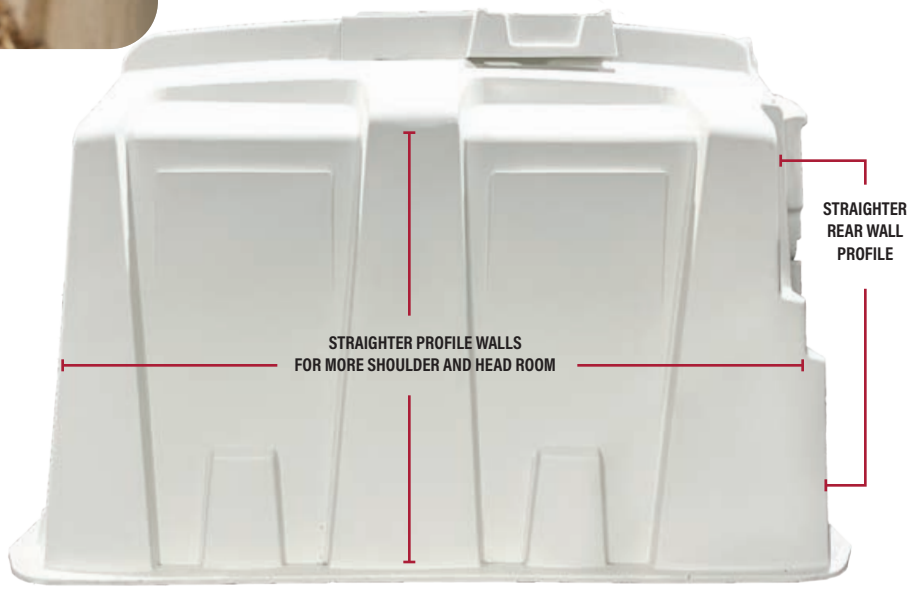

BUILT FOR A

Their future starts with the environment you create. Our wide body calf housing is designed to give calves more usable space while giving caretakers room to work. Thoughtful design, durable construction and practical features help create a comfortable environment they can thrive in from day one.

- **Wide Body Hutches allow for more upper body movement for your calves and caretakers**
- **We offer a more rectangular-shaped structure, providing extra space compared to other hutches with triangular or sloped sides.**

EXAMPLE SHOWN: SL CALF HUTCH

Wide Body Environment (WBE)

Improved Calf Interaction: Accommodates shoulder width and head height, making it easier for calves to turn around inside our calf hutches.

Enhanced Animal Welfare: Increased space creates a more open and less restrictive environment, benefiting both calves and caretakers. This added space not only improves comfort but also supports healthier calf development and more efficient care routines.

Wider Indoor Calf Pens: Our standard indoor calf raising pens feature 48" centers, rather than 46".

Stronger, More Durable Design

More Calf Room: Straighter side walls reduce taper, offering calves additional room and enhanced comfort.

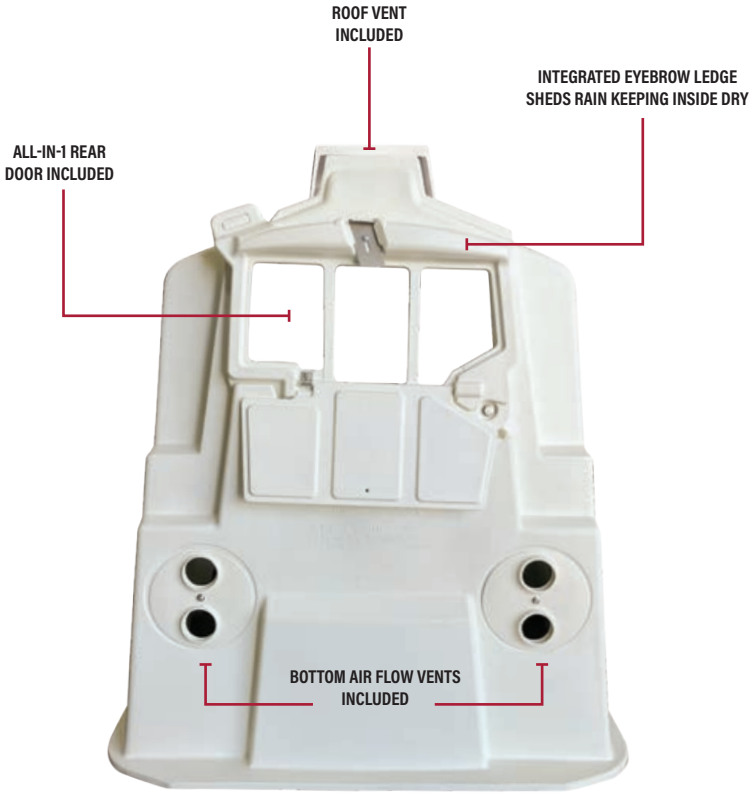

Stronger Plastic: Agri-Plastics manufactures the world's toughest calf housing products using high-grade, color-compounded plastic. This ensures exceptional durability, longevity, and a robust opaque color.

Comprehensive Design for Calf Health:

No Compromises on Accessories: We include all necessary features as standard, without cutting costs on essential items such as the standard Roof Vent, standard Bottom Air Flow Vents, and standard All-in-1 Rear Door.

Optimal Calf Environment: Every design aspect is geared towards what's best for your calves, ensuring their health and growth are prioritized.

BETTER START

Standard High-Quality Features:

Bottom Air Flow Vents: Included as standard to ensure proper ventilation and a healthy environment.

Adjustable Top Roof Vent: Facilitates air flow, preventing moisture buildup and improving air quality.

All-in-1 Rear Door: Combines multiple functions into a single feature for ease of use and enhanced calf welfare. Can be used for bedding, feeding, and ventilation.

Rain Protection: Wet calves are at risk of illness. Our top vent is designed to minimize rain entry, while the rear doors feature a rain shield and straighter back wall to keep the hutch dry and maintain a healthy environment for your calves.

FOCUS ON 5

Reduce calf mortality with Agri-Plastics' Focus on 5, enhancing animal welfare through key life-sustaining housing attributes.

VENTILATION

Optimize air flow and reduce ammonia to enhance calf health and comfort.

BEDDING

Cleaner, healthier calves with easy-access bedding doors.

TEMPERATURE

100% opaque plastic ensures calf comfort with consistent temperatures. Vents ensure optimal air flow.

FEEDING

Agri-Plastics calf products are engineered to optimize food intake and safety, from colostrum to concentrate.

MANAGEMENT

When you're backed by The Calf Housing Specialists, managing your investment is easier and more cost-effective than ever!

CALF HOUSING
SELECTION GUIDE

Regardless of your facility's setup and calf needs, Agri-Plastics has the solutions to shelter your investment.

Our hutches are built to last, while saving you time and maintaining herd health. Our innovations are based on our own experiences raising calves and decades of experience in calf rearing.

Climate Control

Whether you live in extreme heat or bitter cold, your particular climate will affect which features matter most to you and your calves' health. That's why Agri-Plastics offer hutches with right or left offset doors or full openings to accommodate varying climates.

Built for Your Operation

At Agri-Plastics, we understand that calf housing is never "One Size Fits All." What works for a small dairy most likely will not work for a large operation, so we offer a variety of options and sizes to make sure you can find the best fit for your operation.

AGRI-PLASTICS
The Calf Housing Specialist®

Individual Calf Housing Options

Starter Pens

STARTER PEN

For calves 0–10 days old*

Set directly on the ground or use our optional Elevated or Movable Starter Pens.

Flex Hutches

DryZone Slat Floor, See pages 17 and 35

FLEX-HUTCH

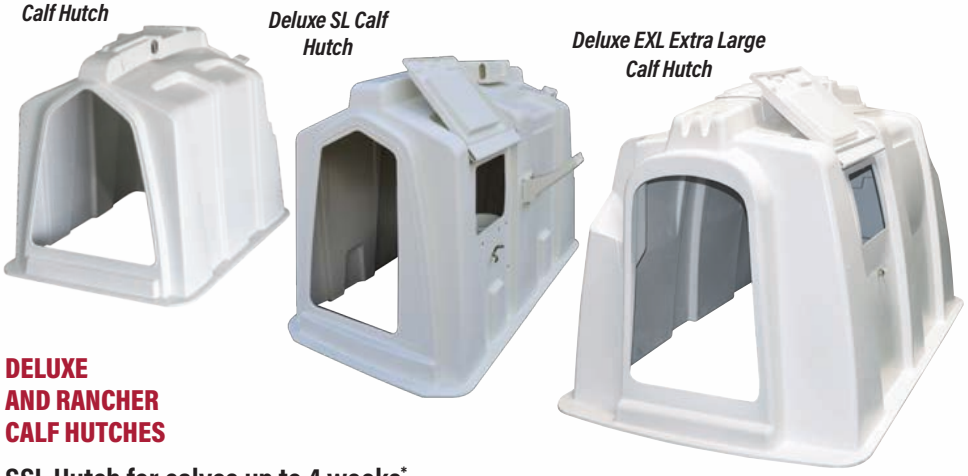

For up to 8 week old calves*

Sturdy construction accommodates two or three calves; cleanup and maintenance are easy, economical and efficient.

SSL Space Saver Calf Hutch

Deluxe SL Calf Hutch

Deluxe EXL Extra Large Calf Hutch

DELUXE AND RANCHER CALF HUTCHES

SSL Hutch for calves up to 4 weeks*, SL Hutch for calves up to 10 weeks*, EXL Hutch for calves up to 12 weeks*

The Deluxe SSL Space Saver Calf Hutch works well for shorter periods of time or smaller calves. These hutches facilitate air flow, comfort and cleanliness.

For standard growth periods of up to 10 weeks of age, turn to the Deluxe SL Standard Length Calf Hutch. Most popular for weaned calves. Choose between side or rear feeding options.

The Deluxe EXL Extra-Large Calf Hutch accommodates longer growth periods up to 12 weeks. The wider Dual XL Hutch is for paired calves up to 8 weeks* of age.

* May vary depending on hutch configurations, farm practices and breed.

Multi Calf Housing Options

Open Air Flex-Pens

Ultra Flex-Pens

OPEN-AIR FLEX-PENS AND ULTRA FLEX-PENS

For Single or Paired Calves up to 12 week old calves*

This innovative solution to calf housing allows calves to be housed individually or grouped together via the easily detachable center panel. Choose from plastic front/rear doors or galvanized metal front/rear doors.

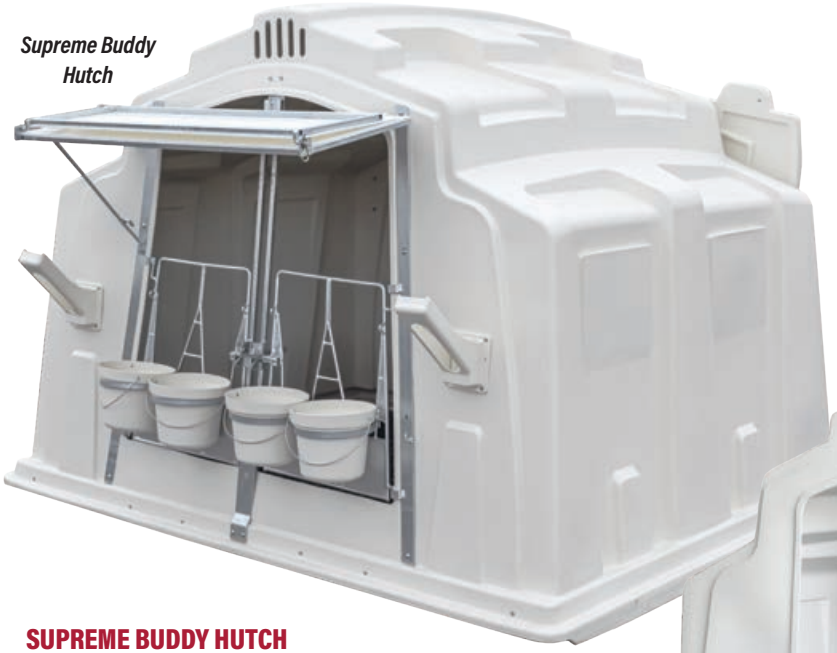

Dual XL Rancher Calf Hutch

DUAL XL CALF HUTCH

For up to 8 week old calves*

Same great features as our Single Calf Hutch line but made for paired calves. Features a wider, taller door opening, plus the ultimate in rear ventilation control.

Supreme Buddy Hutch

Group Hutch

SUPREME BUDDY HUTCH AND GROUP HUTCH

Supreme Buddy Hutch for calves up to 14 weeks*

Group Hutch for calves up to 20 weeks*
(when using Transition Pens)

Helps reduce calf stress by pairing calves in one hutch. Ease your calves' transition from hutches to group housing by using our Group Hutches.

STARTER PEN

SELECTION GUIDE FOR SINGLE CALF HOUSING

Available in 3 options: Standard, Elevated, Movable • For Single Calves 0-10 days old*

The Starter Pen from Agri-Plastics is designed to this specific size so you can easily train your calves to drink properly and get them off to a healthy start. These units are just for short term use before moving your calves to your Calf Hutches, larger Indoor Pens, off-site Calf Ranch, Group Housing or Robotic Feeding setups.

The Elevated Starter Pen is designed for optimal drainage. It is made with a slatted floor that sits above the ground on galvanized metal legs. The Movable Starter Pen has two swivel wheels with brakes and two rigid wheels that are mounted directly to the slatted floor which makes it convenient for changing locations.

OPTIONS:

Heat Lamp Holder
AGRI-6009

* May vary depending on hutch configurations, farm practices and breed.

"Our Starter Pens work well in the colder months to help get calves warmed up and dried off. With a heat lamp on them they get a better start with less stress in the first few days of life".

– Greenmoor Farms

TIP: Remove the front door, and use the Starter Pen as a "Cuddle Box."

TIP: Add an extra layer of warmth by attaching a heat lamp.
Heat Lamp Holder: AGRI-6009
(Lamp/Light bulb not included.)

WHAT SETS OUR CALF PENS APART

Provide your youngest calves with housing designed for their needs to give them the best start. Our Elevated Starter Pens feature slatted floors for improved ventilation and can be easily flipped for quick, thorough cleaning.

CUSTOMIZED INDOOR PENS:

Protect your calves – and your investment – with the versatile Flex Pen Systems from Agri-Plastics. Both the Ultra Flex Pen and Open Air Flex Pen transition effortlessly from single to group housing simply by detaching the side panels and using the Group Housing Bar to connect the pens. Molded from super-tough polyethylene, these lightweight, durable units assemble quickly with easy-glide rods and are packed with features that enhance calf safety and producer convenience.

The Ultra Flex Pen features side panels with integrated sliding vents to comply with specific regional ventilation regulations. The Open Air Flex Pen includes all the benefits of the Ultra model, plus front and rear panels made from hot-dipped galvanized steel for enhanced airflow, visibility, and access. Its side panels also feature a wire grid window to improve air circulation and allow visibility to adjacent calves.

3

3. Hinged back joint for rear of the hutch cleaning access and moving

FLEX-HUTCH™*

SELECTION GUIDE FOR SINGLE CALF HOUSING

Available in Two Calf or Three Calf Configurations
For calves 0-8 weeks old*

Each Flex-Hutch can house two or three calves depending on your choice of configuration. The Flex-Hutch can be placed directly on the ground or it can also be mounted on DryZone, our elevated slatted floor. The sturdy plastic construction is easier and less expensive to maintain than wooden hutches while lasting up to four times as long, saving you time, money and headaches.* Patented

Flex-Hutch Features:

- Cleans and sanitizes easily, so you can put it back in service with zero downtime
- Simplifies chores such as bedding, feeding, watering and cleaning
- Provides shelter against all types of weather
- Adjustable, hinged Flex-Roof Cover™ opens in one easy movement
- Adjustable Rear Door allows single-motion ventilation control
- Comes with Pails and Pail Rings
- 10-year limited warranty

DUAL XL HUTCH

FOR PAIRED CALF HOUSING

For Paired Calves up to 8 weeks old*

The Dual XL Hutch is designed for paired calf housing, giving two calves room to move, rest, and socialize up to approximately eight weeks of age. Flexible feeding and bedding access, adjustable ventilation, and thoughtful door design support comfortable care and efficient daily routines. Housing calves together encourages early companionship and social development in a practical, durable system.

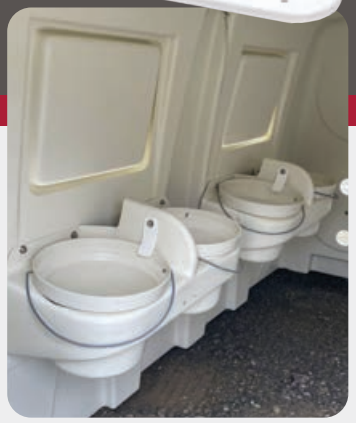

DUAL XL: 23.8% LARGER than comparable hutches!

Feeding, Bedding & Ventilation

The All-in-1 Rear Door provides access and ventilation. The Dual XL comes standard with three large rotary vents along the bottom, with two more optional vents available. Optional Side Doors provide further access for feeding, bedding and ventilation while protecting calves from the weather when closed.

* May vary depending on hutch configurations, farm practices and breed.

SUPREME BUDDY HUTCH FOR PAIRED CALF HOUSING

For Paired Calves 0-14 weeks old*

This modified Group Hutch works perfectly for paired newborn calves for accelerated calf growth. By pairing calves together, stress is reduced and their overall health and development is improved. Benefits of paired housing include: reduced weaning distress, faster weight gain, promotion of solid feed intake, increased socialization, and minimized cross-suckling. Calves can be housed together or separate, based on the needs and preference of the producer. **AGRI-4060**

"Calves are the future of our dairies. This system helps us achieve incredible performance in our calf program."

GROUP HUTCH

FOR PAIRED OR GROUP CALF HOUSING

INDUSTRY 1ST
Swing Up Rear Bedding Door

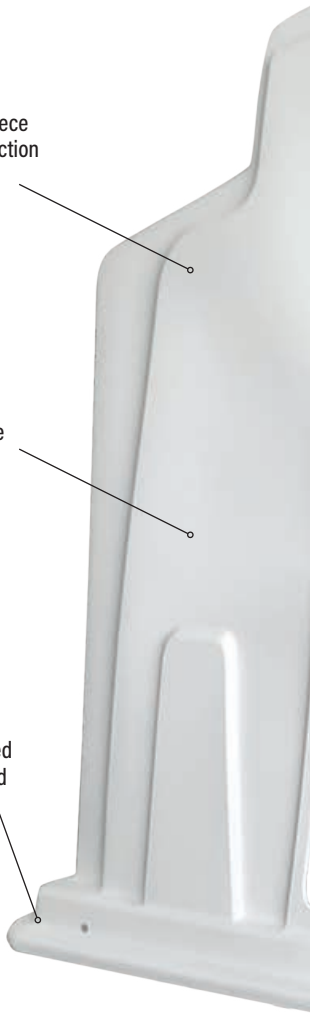

Ridge Vents for Air Flow

One-Piece Construction

Truly Opaque

Integrated Poly Skid

For Group Calves up to 20 weeks old*

Stress can be detrimental to calf health and growth. Our Group Hutches are designed to ease the transition from individual to group housing, and to make it easier for your crew to provide the best care. The Swing-Up Rear Bedding Door makes it easier to add bedding, facilitates cleaner housing and raises healthier calves. This hutch is molded in one piece for superior strength that will withstand tough conditions. Our group hutches have no seams, no rivets and no points of weakness. The extra hutch height accommodates longer growth periods, multiple vents for optimal ventilation and has a truly opaque design.

AGRI-4033

"We love Agri-Plastics Hutches! With the Swing Up Rear Door, they're great for ventilation, bedding and checking on the calves."

- G. Whitten, New York

STANDARD FEATURES:

Integrated Skid

47.6 gal/180L Trough
AFP-1800

26.4 gal/100L Trough
AFP-2000 (For XL Pen Only)

OPTIONAL ACCESSORIES:

Group Hutch Lift Kit
AGRI-4034N

Milk Bar Calf Buddy 5/50L
Feeder: AGRI-MB CB 5-50L

Automatic Feeder
AFP-491

Automatic Feeder with Lid
AFP-492 (See Page 27)

STANDARD AND XL FEATURES:

Tough, aluminum construction

Sturdy front gate panel

Metal rods make assembly easy & quick

XL FEATURES:

Additional rear gate adds 480 sq. ft.

* May vary depending on hutch configurations, farm practices and breed.

Rolling Transition Pen Systems

These pens are made with tough aluminum side panels and come with three mounted troughs and a Lift Kit. This system is also compatible with Milk Bar Systems. Cut down on labor requirements without short-changing your calves with our efficient rolling pens. Cleaning is fast and simple — just roll the fence back and forth to get the job done quickly while causing minimal stress to your calves. Rolling Transition Pen System: **AGRI-4036**

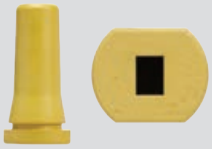

"Feeding efficiency, ease of use and healthy calves are paramount for us. This system allows us to feed and grow multiple calves efficiently. We use bulk feeders for milk and pellets from 2 weeks of age. Commingling keeps our calves calm but competitive. We love the ease of cleaning with the Rolling Fronts. When the calves have grown out, we lift the complete system using the lift kit on top of the hutch, clean out, wash and disinfect."

– Nic Mutsaers, Jogview Farms, Ontario

BETTER FEEDING.
HEALTHIER CALVES.
Less Scours
Faster Weight Gain
Supports Rumen Development
Milk Bar Revolution Snap-On Nipples are designed to mimic natural suckling and support healthy calf development. With built-in flow control, calves feed slower, digest better, and grow stronger – promoting long-term health and performance.
Their performance starts with you.

48" Open Air Flex Pens	**Imperial**	**Metric**
5' Pen		
Dimensions	48" W x 72" D x 45" H	121.9 cm W x 182.9 cm D x 114.3 cm H
Inside Dimensions	46" W x 58" D x 45" H	116.8 cm W x 147.3 cm D x 114.3 cm H
Total Weight	151 lbs.	68.5 kg.
6' Pen AGRI-7146S		
Dimensions	48" W x 84" D x 45" H	121.9 cm W x 213.4 cm D x 114.3 cm H
Inside Dimensions	46" W x 70" D x 45" H	116.8 cm W x 177.8 cm D x 114.3 cm H
Total Weight	165 lbs.	74.8 kg.
7' Pen AGRI-7147S		
Dimensions	48" W x 96" D x 45" H	121.9 cm W x 243.8 cm D x 114.3 cm H
Inside Dimensions	46" W x 82" D x 45" H	116.8 cm W x 208.3 cm D x 114.3 cm H
Total Weight	173 lbs.	78.5 kg.

FLAP DUCT® VENTILATION SYSTEM

FLAP DUCT® Pre-Engineered Ventilation Tube System keeps air flowing in any structure. The FLAP DUCT builds on the best features of the FLIP DUCT Ventilation System to give producers even more control over ventilation requirements for a customized solution that shelters your biggest investment – your calves. They have been serving the farming community since 1997, are made in USA, and improve air quality and barn temperature for improved milk production.

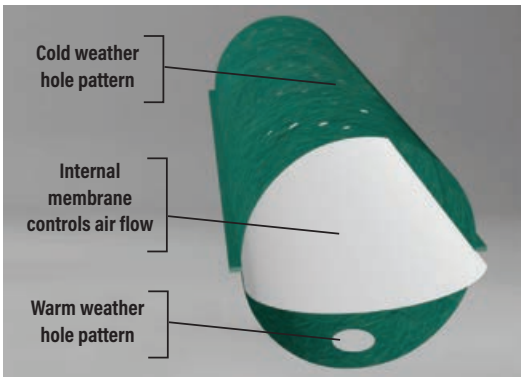

Key Advantages

- Easy, single-lever control
- Ideal for all seasons
- Customize airflow for your herd
- Adjust for warm or cold weather

The FLAP DUCT Ventilation System gives producers outstanding control over ventilation requirements for a customized solution that shelters your biggest investment – your calves.

Agri-Plastics understands that individual setups often need individualized solutions. With FLAP DUCT, the patented internal membrane can be adjusted up or down to adjust the airflow based on seasonal conditions with the simple flick of a lever.

With the membrane in the up position, high speed air showers calves during warm weather. Simply move the lever down to adjust the membrane to the bottom of the tube to deliver slow, non-drafty fresh air during cold weather.

Once installed, the membranes can be moved up or down to precisely control airflow based on your herd's needs in every season.

MILK BAR™ REVOLUTION NIPPLE

Milk Bar™ Revolution Snap On Nipple – A ground- breaking innovation for farms using bottle systems! The Milk Bar Revolution has five slits positioned on a circle to control the flow no matter which way the bottle is placed. These are extremely durable with a superior life span compared to any other bottle nipple. Calves drink at the right speed, produce lots of saliva and are very content after feeding.

Black Revolution Nipple
Per 1: AGRI-MBREV-1 • Box of 100: AGRI-MBREV

Yellow Starter Revolution Nipple
Per 1: AGRI-MBCOL • Box of 100: AGRI-MBCOL-2

Benefits:

- 5-slit opening controls milk flow
- Minimizes cross sucking
- Helps rumen development
- Snaps on quickly and easily

Back Design: Snap on
Feeder Type: Snap on bottles

Easy to use, long lasting and with an extraordinary improvement in calf performance, the Milk Bar Revolution Snap On Nipple is a must-have for farms using bottle systems!

The nipple snaps onto bottles easily, thanks to the unique natural rubber formulation. It stays securely in place allowing you to carry full bottles by the nipple. Wash with a gentle detergent like dish washing liquid. Not chorine compatible.

Their Future Starts with YOU.

The environment you create today helps shape the animals they become tomorrow. From comfort and protection to the space calves need to grow.
Agri-Plastics calf housing is designed with both calves and caretakers in mind. Our wide body designs provide generous usable space, durable construction and practical features that support everyday calf care.

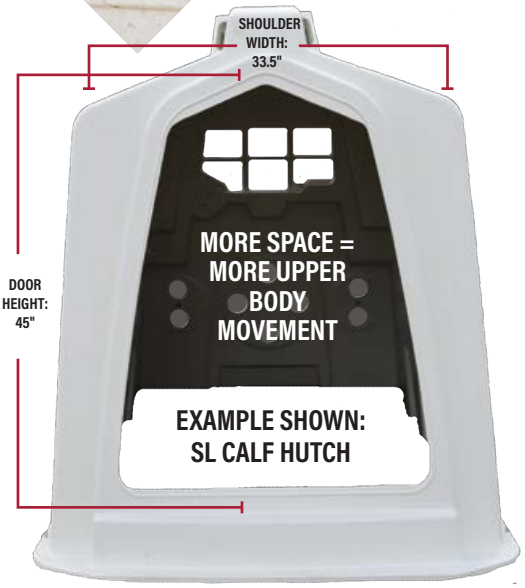

Wide Body Environment (WBE)

Improved Calf Interaction: Accommodates shoulder width and head height, making it easier for calves to turn around inside our calf hutches.

Enhanced Animal Welfare: Increased space creates a more open and less restrictive environment, benefiting both calves and caretakers. This improved space fosters better well-being for your calves and provides more room for your team.

Wider Indoor Calf Pens: Our standard indoor calf raising pens feature 48" centers, rather than 46" centers.

Stronger, More Durable Design

More Calf Room: Straighter side walls reduce taper, offering calves additional room and enhanced comfort.

Stronger Plastic: Agri-Plastics manufactures the world's toughest calf housing products using high-grade, color-compounded plastic. This ensures exceptional durability, longevity, and a robust opaque color.
